

# LONG LASTING SURFACE PROTECTION

## *COMMON AREAS AND AMENITIES*

*PROTECT Surface Protection Program  
with the AEGIS<sup>®</sup> Microbe Shield<sup>®</sup>*

# Products

*A proven process that provides enduring surface protection for up to 1 year.*

PROTECT Surface Protection Program cleans, disinfects and then treats the surfaces that touch our lives with the AEGIS Microbe Shield to provide enduring **protection for up to 1 year**.

## Step 1: Cleaning & Disinfection

The first step in the Surface Protection Program is to prepare the surface prior to AEGIS treatment. There are 3 different levels of *clean* that our programs can achieve based on your needs.

### Cleaning

Cleaning removes microbes, dirt, and impurities. This process does not kill microbes, but by removing them, it lowers their numbers.

### Sanitizing

Sanitizing reduces but does not eliminate the population of microorganisms on treated surfaces.

### Disinfecting

Disinfectants kill microbes reducing their populations by 99.9999%.

## Step 2: Antimicrobial Treatment

**aegis**®

### Surface Protection for up to 1 Year

Globally registered, AEGIS is the world's most widely used antimicrobial surface treatment.

AEGIS forms a protective coating that molecularly bonds with products upon application and inhibits the growth of microbes on surfaces.

When applied to surfaces, AEGIS forms a colorless, odorless, positively charged polymer that attracts, then electrocutes, ruptures, and disintegrates a microbe's negatively charged cell membrane.

AEGIS has a history of safe use and durability, ensuring long-lasting antimicrobial efficacy.

 *Effective for up to 1 year*

# Programs

*Designed to protect the surfaces where you live, work and play.*

Our programs are effective on all types of surfaces including glass, fabric, metal, carpeting and plastic.

## Common Areas & Amenities

This program is recommended for areas where people meet in groups. Cleaning, disinfection and AEGIS treatment typically includes the following:

Floors, walls, ceilings, furniture and equipment in common areas and building amenities:

- Gyms
- Theater
- Pool, sauna and spa
- Lounge
- Board room
- Computer hub
- Games room
- Kitchenette
- Library
- Craft room

*Recommended Every 2 to 3 Years\**

## 1 High-touch

*Recommended Annually\**

This program treats all high-touch surfaces within selected common area and amenities that are typically touched by hand including equipment handles and touch screens.

## 2 All Surfaces

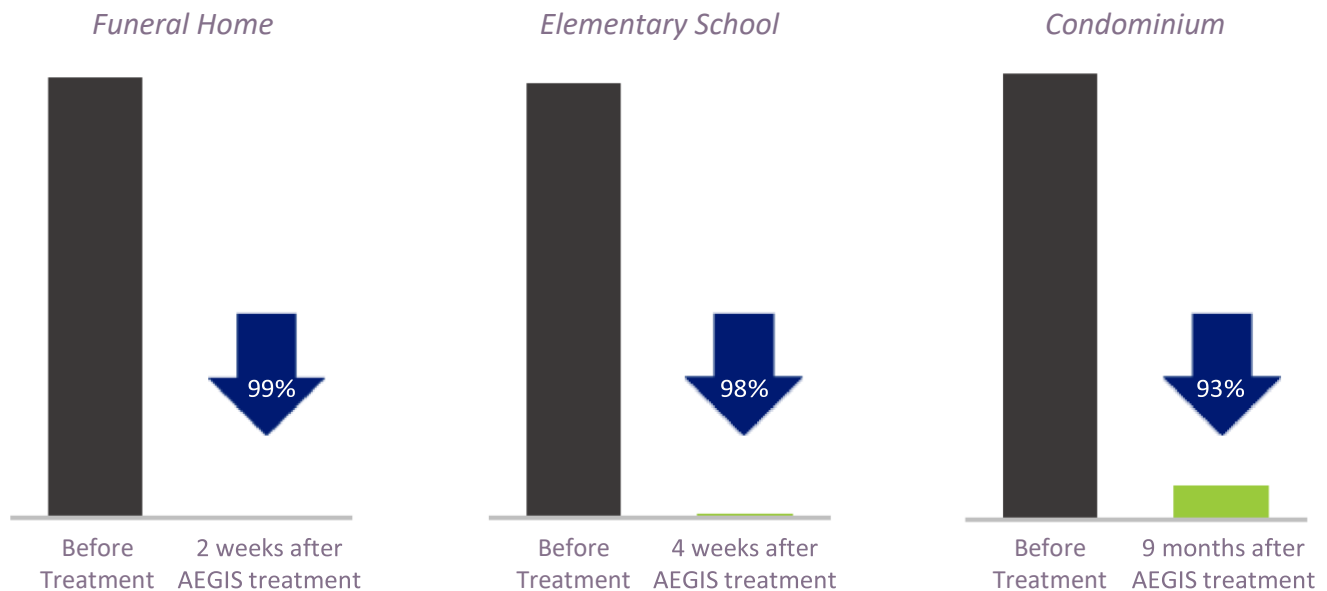

This three-dimensional treatment includes all high-touch surfaces as well as environmental surfaces including walls, floors and equipment surfaces.

*\*Depending on your cleaning protocol. Harsh and abrasive cleaners can reduce the life of AEGIS.*

# Independent Test Results

Testing was conducted by independent labs, showing the sustained decrease in surface microbial contamination. Additional tests and case studies available upon request.

## Approvals & Care

AEGIS is not a disinfectant. AEGIS is registered with health authorities around the world including Health Canada and the US Environmental Protection Agency. Health Canada PCP 15133, US EPA 64881-1

AEGIS and the AEGIS Microbe Shield are trademarks of Microban International.

### How to Care for AEGIS

- AEGIS bonds instantly and dries in 3 to 5 minutes on high-touch and high-traffic surfaces, 1 US EPA # 64881-2 2 to 24 hours on treated fabrics such as carpets.
- AEGIS can be weakened or deactivated over time by highly caustic materials (pH 11+).
- Clean AEGIS treated surfaces with soap and water or non-caustic disinfectants.
- AEGIS can be removed by abrasion.
